Subject: Lake Memphremagog responses to follow-up GAC questions
Attachments: 2018-12-06 EPA Canada Questions.pdf

Good Afternoon Sean, Morgan, Danielle, Guy, Arash, Steve, Felicia:

Attached as a PDF is the updated document from VT DEC that now includes responses to the three follow-up questions submitted by Sean Sunderland at Global Affairs Canada. I have also pasted the text below.

Thanks once again to Neil Kamman and Company at VT DEC for pulling together the updated file.

Happy Holidays!

Question 19: What happens after the reconvened 250 hearing process on January 22nd?

Response 19: The District Commission will receive pre-filed documents and will hear testimony or clarifications from the parties. The Commission will then deliberate, and DEC is not able to predict the steps they may elect to take.

Question 20: Can we expect a delay of (weeks? months?) before the District Commission files a revised memorandum of decision?

Response 20: DEC is not able to predict the timing of the District Commission's decision-making at this time.

Question 21: Depending on the submissions it receives, is it possible the District Commission might reverse its earlier decision to permit (greenlight) the dump expansion?

Response 21: DEC is not able to predict the decisions the District Commission might take in this regard. There are a range of options the Commission could exercise, from no-change, to the inclusion of additional conditions in their Land Use Permit, to reversal of their earlier decision.

Regards,

Paul
